

Name: Shubhro Dev

Roll: 22CS3057

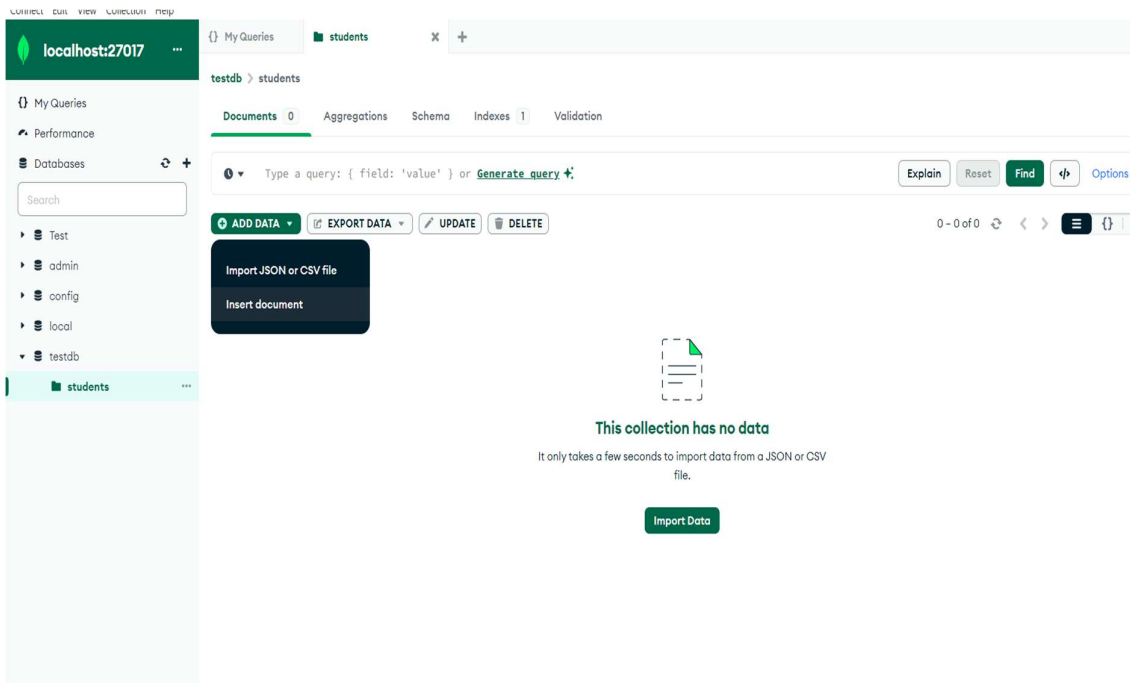

1. Connect to a MongoDB server using MongoDB Compass.

2. Create a new database named "testdb" in MongoDB Compass.

3. Create a new collection named "students" in the "testdb" database.

3. Insert ten documents into the "students" collection with the following fields: name, age, and email.

Type a query: { field: 'value' } or [Generate query](#)
